DETAILED ACTION

Applicant should note that claim 23 is depending from itself.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20 and 27, drawn to a composition comprising at least one anti-microbial antibody and at least one anti-microbial agent, classified in class 424, subclass 278.1. If applicant elects this group, applicant is required to elect a specific combination of antibodies and agents. For example, the antibodies and the agents may both be anti-viral, anti-bacterial, anti-fungal or anti-parasitic, or one from each category. Applicant is required to identify the number and type of each anti-microbial antibody and anti-microbial agent within the composition.
- II. Claims 21-26, 28 and 29, drawn to a method of treating and preventing respiratory disease, classified in class 424, subclass 184.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method of using can be practiced with different combinations of anti-microbial agents and anti-microbial antibodies. Each possible combination would be specific for the different diseases being treated because each product within the combination would have specific structural characteristics to carry out the appropriate function.

Art Unit: 1648

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
